Professional Engineers Ontario strives to meet the needs of Ontario society by licensing and regulating the entire practice of professional engineering in an open, transparent and inclusive manner.

THIS ISSUE: Technological innovation has always been the *sine qua non* for engineering practitioners. Innovation, however, is becoming even more essential as engineers look to make a greater statement about the public policy implications of their work. This issue showcases just a sample of engineering innovation at work.

Engineering Dimensions (ISSN 0227-5147) is published bimonthly by the Association of Professional Engineers of Ontario and is distributed to all PEO licensed professional engineers.

Engineering Dimensions publishes articles on association business and professional topics of interest to the professional engineer. The magazine's content does not necessarily reflect the opinion or policy of the council of the association, nor does the association assume any responsibility for unsolicited manuscripts and art. Author's guidelines available on request. All material is copyright. Permission to reprint editorial copy or graphics should be requested from the editor.

Address all communications to The Editor, *Engineering Dimensions*, PEO, 25 Sheppard Avenue West, Suite 1000, Toronto, ON M2N 6S9. Tel: 416-840-1062, 800-339-3716. Fax: 416-224-8168, 800-268-0496.
