

ANNUAL INDEX

The index consists of two parts: subject and author. Both are listed alphabetically, with the reference giving first the issue, then the page number and finally, the type of article. For example, checking under "manufacturing" gives the reference, "PEO gives thumbs up to new manufacturing initiative, **J/F**, 34-37, F." This indicates that in the January/February 2012 issue on pages 34-37, there is a feature article about manufacturing.
