

# ANNUAL INDEX

The index consists of two parts: subject and author. Both are listed alphabetically, with the reference giving first the issue, then the page number, and finally the type of article. For example, checking under "education" gives the reference, "Educating future engineers about health and safety, *J/F*, 48-50, F." This indicates that in the January/February issue on pages 48-50, there is a feature article about education.
