

# ANNUAL INDEX

The index consists of two parts: subject and author. Both are listed alphabetically, with the reference giving first the issue, then the page number, and finally the type of article. For example, checking under "licensing" gives the reference, "APEGA to appeal human rights tribunal ruling, M/A, 14-15, N." This indicates that in the March/April issue on pages 14-15, there is a news article about licensing.
