

**Christian Bellini, P.Eng., FEC**

Structural Engineer  
Director, Engineers Canada  
Vice President (2019-2020), PEO  
Candidate for President Elect, PEO

I am a practicing structural engineer. As a Partner at my firm Blackwell, which I have helped grow from 2 people to over 60, I split my time between doing engineering design and running the firm – I have a strong foundation in both engineering and business. I also serve on the Board of Engineers Canada. I have spent the last 15 years volunteering extensively for PEO and most recently served a term on PEO Council. 23 years of project based work has helped me develop a strong ability to pragmatically lead teams, finding common ground and building consensus without compromising basic principles.

I am passionate about engineering regulation and - in particular - about PEO's self-regulation model. We have been rightly granted legislative authority to regulate engineering in Ontario - as engineers we are best qualified to do this. However, we need not look far to see very real risks to our self-regulation. Proactively, we have recently undergone an external regulatory review of our operations, procedures and our work. The Cayton Report outlines a number of recommendations which we are now considering. I have been directly involved in this work with my continuous involvement with PEO and Council over the last 15 years. We have a unique opportunity to broadly rework and modernize PEO's regulatory activities. It is critical that we approach this needed change in a thorough, thoughtful and well resolved way so that the outcome is a modern and effective PEO which is also able to nimbly adapt to today's fast changing engineering environment. Completing this work will take more than the length of one term of office, so we must lay the groundwork now. My broad experience with PEO's regulatory activities and my extensive work experience bringing large complex projects to fruition makes me the most qualified candidate for this role.

So what made me decide to run for Council again? As an organization PEO faces some current significant challenges and I believe my extensive regulatory and business experience will be valuable in leading the way to the future. Some of the challenges are:

1. A need to ensure that all engineering practitioners, regardless of their field or type of practice, are licensed. While enforcement will always be an important tool, increasing the real and perceived value of licensure will have the biggest impact.
2. Modernizing our licensing process to encourage more engineering practitioners to follow through on licensure.
3. Protecting our self-regulatory mandate by pursuing external regulatory and governance reviews and acting on them to ensure that our service to the people of Ontario is at the cutting edge of engineering regulation.
4. Working collaboratively with EC, OSPE, CEO and our other partner organizations to ensure that we do not mix our mandates, but cover all aspects of engineering in Ontario and Canada.

## **Education**

Honours B.A.Sc. in Civil Engineering with an option in Management Sciences, University of Waterloo, 1994.

## **Career Summary**

Blackwell Structural Engineers  
Senior Principal / 2014-Present  
Principal / 2008–2014  
Senior Associate / 2005–2008  
Associate / 1998–2005  
EIT / 1995–1998

University of Waterloo  
Adjunct Faculty / 2014-Present

Having worked at this firm for 24 years, I have helped it grow from two people in 1995 to a firm of over 60 staff members that provides structural engineering services on a wide range of projects across many building categories. Many of the projects completed by Blackwell have been honoured with awards in both architecture and engineering, and in my own portfolio I count several projects that have been awarded the Governor General's Medals in Architecture. Additionally, since 2014 I have taught undergraduate structural design courses at the University

of Waterloo. I am also frequently a guest critic at Architecture Studio Reviews at the University of Toronto, Ryerson University and Dalhousie University.

### **Professional Activities**

#### Current PEO Service

- Experience Requirements Committee (former Chair, Vice-Chair)
- 30x30 Task-Force (Vice-Chair)
- Licensing Committee
- Advisory Committee on Volunteers (former Vice-Chair)

#### Past PEO Service

- Executive Committee
- Legislation Committee (Chair)
- Finance Committee
- Consulting Engineer Designation Committee
- National Framework Task-Force (Vice-Chair)
- Overlapping Practices Committee (Chair)
- National Mobility Task-Force

#### Engineers Canada Service

- Director, Engineers Canada Board
- Canadian Engineering Qualifications Board
- Licensing Affairs Committee (Vice-Chair)
- Competency-Based Project for the Assessment of Engineering Work Experience – participated in various stages of the development of this initiative
- Canadian Framework for Licensure – participating in this initiative

### **Community Service**

- Director and President of a student housing cooperative of over 900 students
- Director and Secretary of Kindercircle Daycare, Toronto

### **International Community Service**

I helped to form an alliance of four engineering firms in Toronto to supply 18 months of pro-bono engineering services to re-build schools in Haiti after the earthquake. The work of the alliance included design to Canadian building codes and standards, a presence on site during construction in an advisory role and training of local engineers to continue with the programme. This project won a Consulting Engineers of Ontario Award, an Association of Consulting Engineers of Canada Award and a Wood Design Award.

I hope that I can count on your support.
