PEO GOVERNMENT LIAISON PROGRAM (GLP)

The PEO Government Liaison Program's main objective is to ensure that government, PEO members, and the public continue to recognize PEOs regulatory mandate, in particular its contributions to maintaining the highest level of professionalism among engineers working in the public interest.

The GLP is based on a strong local presence, a legislative framework, and policy and communications support. Some of the many events and activities that the local PEO chapter GLP representatives engage in to develop relationships and further recognition and understanding of PEO's role with local MPPs are profiled in this newsletter.

ENGINEERING DIMENSIONS PUBLISHES STORY ABOUT RADIOHEAD RECOMMENDATIONS

RADIOHEAD CORONER'S INQUEST RECOMMENDATIONS CONSIDERED BY PEO COUNCIL

By Adam Sidsworth

One month before the engineer involved with the Radiohead temporary stage collapse went before PEO's disciplinary panel, Council considered key recommendations stemming from the coroner's inquest into the death of Radiohead drum technician Scott Johnson.

At its November 15, 2019, meeting, Council voted to publish its *Design Evaluation and Field Review of Demountable Event and Related Structures* practice guideline. The guideline was developed by PEO's Professional Standards Committee over the last three years and began prior to the coroner's April 10, 2019, delivery of its verdict into the death of Johnson. Johnson died on June 16, 2012, when the event's temporary stage collapsed just hours before the band was scheduled to take stage. PEO developed the guideline with consultation from numerous stakeholders, including the Large Municipalities Chief Building Officials, the provincial ministries of Labour and Municipal Affairs, Consulting Engineers of Ontario and the Ontario Society of Professional Engineers.

The guideline sets the best practices for the design evaluation of demountable event structures as defined in the Ontario Building Code and similar structures exempted from it, such as television and movie sets, and structures exempt due to size or height in addition to demountable event structures designed by practitioners for multiple

ADDITIONAL RADIOHEAD MOTIONS

Two additional recommendations stemming from the Radiohead coroner's report were presented at the Council meeting separately from the motion to approve the *Design Evaluation and Field Review*

This article was published in the January/February Issue of *Engineering Dimensions*.

Engineering Dimensions published a story about the Radiohead recommendations that are being considered by PEO Council.

Here are a couple highlights from the PEO Council report covered in the same issue.

"...It was recommended that Council approve a new practice guideline describing best practices for engineering work on demountable structures ... and which was informed by, and reflects lessons learned from, the recommendations of the coroner's inquest."

"At the Council meeting, Council approved this recommendation and directed the registrar to seek amendments to the Professional Engineers Act and take other necessary actions to implement this new process."
