REPRESENTATION FOR A NEGLECTED MEMBERSHIP

I am standing on your behalf to demand to be engaged and consulted when new licensing requirements are placed on us. Aren't we supposed to be self-governing?

Financial Accountability: PEO's spending addiction resulted in a 20% fee increase in 2019, passed without member consultation or approval. (The incumbent councillor voted in favour of this increase.) I will bring engineering precision and solid business and management experience to review PEO's financial position and optimize the use of PEO's monetary resources. Our members' money needs to be used more wisely!

Empowering members to practise engineering: Make it easier for members (licensed engineers) to provide engineering services to the public without them having to be an employee of a big corporation or having to incur large costs and overhead to incorporate and register twice.

Bringing the voice of members to Council: It is becoming common practice at PEO that we, the members, are subject to major new requirements without being consulted. Whatever happened to self-governance? Since 1922, we have always protected the public interest faithfully. Self-government works!
