

2020 Council Elections E-Blast 2

**Lisa MacCumber, P. Eng., FEC, OOH** for West Central Regional Councillor

Please vote to re-elect Lisa MacCumber for West Central Regional Councillor to help me continue the work of modernizing PEO and bringing relevancy back to our profession.

PEO has the privilege through legislative authority to regulate engineering in Ontario. PEO must continue to be a leader in modernized self-regulation to remain relevant and be able to adapt to a rapidly changing world, while considering the public interest as paramount. We are not immune to threats to our self-regulatory status. The Attorney General and their staff have a copy of our regulatory review. There have been 2 coroner inquests in recent years due to accidents that jury recommendations partially attribute to engineering regulation.

Vote for the candidate with the experience and knowledge of PEO as a regulator that puts the public interest first. If elected, I would like to continue to provide direction and oversight on:

- Governance Improvements;
- Fiscal Accountability; and
- Focus on PEO's regulatory mandate in the public interest.

This is accomplished by properly defining the problem and using evidence-based data to develop better policy that is reflective of a rapidly changing and respected profession. This includes policy development related to continuing professional development, accountability for committees and fee increases, all hot topics this election. For example, did you know that our fees are among the lowest of all engineers in Canada and other self-regulated professionals in Ontario, including pharmacists, teachers, dentists, planners, and accountants?

My experience with the realities on council and on PEO regulatory committees shows that I have the skills needed to lay the groundwork to continue to move PEO forward and support good governance to allow us to fulfill our mandate with focus on regulation in the public interest.
