Years of Registration in Ontario: 32 years

Candidate statement:

1. The Chapter program is vital to our Profession. This is where membership learns about PEO and chooses to volunteer and get involved. Eliminating the Chapter program would not only remove a significant venue for communication with all licensees but also the local presence for the general public in each of our communities.
2. The Cayton Regulatory Review identified areas where PEO needs to transform itself. To be effective, it is important for PEO to introduce mechanisms to have a two-way communication with membership to maximize the effectiveness of the renewal that has started. Let us take advantage of this opportunity to have positive impacts on the reform.
3. Grassroots Participation: New strategies are required to entice licensees to participate in the Association election process both as candidates and exercising their right to vote.
4. A shorter and simplified licensing process to make the progression through licensure less strenuous for Canadian and Foreign trained license applicants. This also includes a review of the academic requirements.

I encourage you to take time to get to know all the candidates and to vote. Have your say. Be proud of our Profession! This is why I decided to get involved and seek a position on Council. My email address :
