

New online P.Eng. application system

As of July 11, 2022, PEO has implemented a new, fully online P.Eng. application system through the PEO portal. This new digital application system represents a big step forward in modernizing PEO's licence applications process and aligns with our ongoing [enterprise-wide transformation](#).

New applicants will need to create an account to access the [PEO portal](#). Once you have registered for an account, you may log in and navigate to the application tab to start the P.Eng. licensing application.

Visit the [Become a Professional Engineer webpage](#) for information on the application process and requirements for licensure.
