

Marilyn Spink, P.Eng., CSP, B.A.Sc. Queen's University – Licensed with PEO since 1995

As a practicing Engineer for over 25 years, I now act as a trusted advisor to a wide range of global clients via my advisory practice. My clients value the expertise I bring to them from my successful engineering management of multi-discipline design teams delivering complex international projects valued from \$US500M to \$9B.

As a Lieutenant Governor Appointee to **PEO Council** for the last 6 years, with your support, I will hit the ground running as your Vice President Elect. **During my time on Council, I volunteered on PEO's Complaints, Audit, Executive and Human Resource Committees. I have also chaired and participated in several Task Forces and Working Groups, including being chosen as Vice President Appointed by my Council peers in 2017.** I

bring solid governance experience to PEO Council, from my past Directorships on several corporate boards and from my current Board role with Avalon Advanced Materials, a Canadian mineral development company focused on metals and minerals for use in clean energy and new technologies.

PEO's Change Vision – "PEO aspires to become a professional, modern regulator that delivers on its statutory mandate and is supported by a governance culture that consistently makes decisions that serve and protect the public interest."

A strong regulator equals a strong Engineering Profession – I am asking for your vote to be your Vice President Elect to help realize PEO's Change Vision so our profession can continue this critical work & transformational journey!
