“Darla has the rare ability to encourage others to think of the big picture, but in so doing she remains focused on and aware of the important details and future obstacles. As a member of the GLC, I was repeatedly inspired to bring my best to the table by her leadership and the example she set. It is evident that Darla **cares about the future of the engineering profession**, and I am lucky to have met someone so early in my career who was interested in supporting young engineers. I imagine that were she elected to lead PEO the **direction she would set for our profession would have an eye to the future and position our profession for success.**”

Daniel King, P.Eng., MEPP
Former member of the Government Liaison Committee

“I had an amazing opportunity working with Darla Campbell during her role as Chair of GLC. I found her **a true leader as she is compassionate, well organized, a good listener, great problem solver, innovative and brilliant**. She always has an unrelenting focus on helping others to succeed in their roles. Her devotion and commitment to the Engineering profession is second to none!”

Hafiz Bashir, P.Eng., MBA, FEC
GLP Chair, PEO Kingston Chapter
