

Who am I?

My name is **Fanny Wong, P.Eng.** and I would like to represent the East Central Region as Regional Councillor on PEO Council.

I am a practicing Professional Engineer in the electrical discipline with over 25 years in consulting engineering. At Jacobs, I have several roles that bring **much experience in engineering, management, and leadership**. I manage and lead engineering design teams to deliver on quality and reliable work for our many clients with complex and intriguing engineering issues to solve. I connect and integrate many disciplines, practices, technologies and solutions together regionally and globally to promote innovation in new and tried technologies.

With over 10+ years serving as member of the Professional Standards Committee and as Chair, since 2018, I have great insight on what is working and what needs change on PEO's governance performance.

Why am I running in this election?

I am proud to be a Professional Engineer and want to directly participate in PEO's mission to regulate and advance the practice of engineering and to protect the public interest.

The **value** of a P.Eng. is being undermined by the public perception that PEO is not relevant with current or emerging technologies, does not consider the fairness and inclusiveness in licensing and regulating, and is not prompt in response to complaints and enforcement.

Council commissioned a governance review and accepted a work plan in November. This review recommends that PEO improve governance in self regulation; refocus on protecting public interests; and promote diversity and inclusion in our licensing and regulating practices.

During this election I urge you to vote for change, for inclusiveness, for doing what is right for our profession, and for a stronger PEO.

Vote for **Fanny Wong P.Eng. FEC. as Regional Councillor.**
