

Leila Notash, PhD, PEng, FEC

I am committed to the principal object of PEO: **“to regulate the practice of professional engineering ... in order that the public interest may be served and protected”**

- I endorse
 - **member involvement self-regulation** by advocating **respect for PEO members and volunteers, transparency and accountability**
 - **knowledge-based decision making** (peer review) that Council has abandoned in recent major policy decisions
 - reinforcing values of **Code of Ethics, Equity, Diversity, Inclusivity**; including **cognitive diversity** and **demographic diversity** on Council and committees.
- I oppose imposition of mandatory **PEAK** until it has proven its value for PEO members and the public, and is approved in member referendum.
- Council must focus on fundamental issues: present and future of **self-regulated** professional engineering; up-to-date principles for **qualifications and practice in a global society**, with **rapid advances in engineering**, and not allow **governance** to continue to hijack Council's mandate.

I am a good listener. As your Councillor, I listen to your concerns and ideas and fight for the necessary changes...

PEO and EC activities

- **PEO Council:** Councillor-at-Large (2019-2021); Audit, Executive, and Legislation Committees (2019-2020)
