

A PROFESSIONAL ASSOCIATION, RUN BY PROFESSIONAL ENGINEERS

Fellow engineers:

First off, I must explain why you will not see my platform statement in Engineering Dimensions and with the ballots. As you know, conditions in the north are not like they are in downtown Toronto. I work at a remote mine location, without cellular service for 100+ km. When the network goes down, there is no alternative for internet. I was simply unable to file at the required time, and PEO's rules were invoked on me. (I wish PEO were as strict in applying its rules to all the large players in engineering, too.)

I want you to know my platform. Please visit <https://www.linkedin.com/in/agneskrawczyk/>.

Many of you already know me: I'm practical, have a mature family, live and work in the north!

- Mining engineer
- University of Toronto graduate, 2003
- Licensed in Ontario since 2010
- **I know Northern Region!** Employed at many mining and consulting engineering companies, including Goldcorp (2004-2007), Kirkland Lake Gold (2010-2014), Vale (2015-2018), Nordmin (2019), BESTECH (2020-2021), Barrick (2021), Wesdome (2021-present). Lived in Red Lake, Kirkland Lake, Sudbury, and Marathon.
- Volunteering with PEO Sudbury chapter
- *A fresh perspective, a fresh voice* for PEO Council

Over a decade as a P.Eng, I've seen how PEO operates; regulating our profession, dealing with large engineering companies, and applying the Act. I've developed a clear perspective about where we should be. I'll be a fresh voice at Council, to take it in a new direction, serving the profession's needs, protecting the public.

Colleagues, I stand for you and for public safety. I stand for **a self-regulated profession, a transparent and responsive Council, and strong Northern representation at PEO**. Help me realize this vision. Please vote!
