

Agnes Krawczyk, P.Eng for **Northern Regional Councillor**

First, let me introduce myself. I am a mining engineer. I graduated from the University of Toronto in Mineral Engineering (Mining specialization) in 2003. After my time as an EIT and working out-of-province, I became licensed in Ontario in 2010.

I know Northern Region, having lived, and been employed in, larger centers such as Sudbury; small and semi-remote communities such as Marathon and Red Lake; and somewhere in between, being Kirkland Lake. I know the obstacles and opportunities that each presents to us.

In the workplace, we are reminded over and over again of our right to participate in the safety program. A licensing association is really the embodiment of a province-wide, discipline-specific safety program, required to protect the public. This association must continue to operate under a democratic process, with openness and transparency. PEO must set aside its obsession with governance and focus on our core responsibilities: **licensing, enforcement, and discipline**. When we do these well, the public is protected, and the profession is respected.

I stand for you, colleagues. I stand for a *self-regulated* profession, and a transparent and responsive Council. I stand for strong Northern representation among our peers on Council. You can help me realize this vision, **but only if you vote**.

A fresh perspective, a fresh voice for PEO Council

A PROFESSIONAL ASSOCIATION, RUN BY PROFESSIONAL ENGINEERS
