

## Brantford Chapter Stubbe's Concrete Technical Tour

### Technical Tour Summary June 20, 2025

The technical tour focused on the Stubbe's Plant #3 production facility that uses a semi-automated carousel palette system technology to produce precast concrete wall panels for the residential and commercial construction industry in Canada.

Understanding the benefits of precast concrete products.

- Quicker installation allows for a fast-building enclosure
- Flexibility in design, shape and architectural finish
- Extremely durable and sound resistant
- Indoor manufacturing environment ensures consistent quality

Further resources can be found at the **Canadian precast concrete institute**
