The Peer Project - Youth Assisting Youth – Volunteer
Association of Consulting Engineering Companies Ontario - Volunteer

Years of registration in Ontario: 9

Candidate Statement

As a Professional Engineer with over 13 years of experience delivering water and wastewater infrastructure across Ontario, my career has been devoted to protecting the public interest through engineering solutions that are safe, reliable, and sustainable. In my role as Vice President at Environmental Infrastructure Solutions Inc., I lead a multidisciplinary team through design and construction, ensuring projects are delivered with quality, accountability, and collaboration. My career reflects technical excellence, strategic leadership, and the ability to build consensus among diverse stakeholders.

For more than a decade, I have volunteered with PEO's Toronto Humber Chapter, serving as Chair and Vice Chair, and in other leadership roles. I have supported initiatives including the Government Liaison Committee, the Scholarship Program, and the Licence Assistance Program. These experiences have strengthened my ability to connect policy with practice and have prepared me to contribute meaningfully to Council. PEO needs leaders who can bridge policy and practice while elevating the profession through clarity, collaboration, and integrity. I am committed to advancing meaningful change that supports PEO's mandates and strengthens public trust.

As Councillor-at-Large, my priorities will be to enhance member engagement so Council decisions reflect industry realities, reinstate and modernize the EIT program to support aspiring engineers, build stronger collaboration with OSPE to elevate engineering in Ontario, and champion quality-based selection for engineering services to protect the public interest.
