

Re-Elect Chantal Chiddle, P.Eng., FEC for Eastern Regional Councillor

An accomplished civil engineer with more than 25 years of experience across water, wastewater, and heavy civil infrastructure, I have led multidisciplinary teams in delivering major public works projects in Ontario. I bring a well-rounded, practical perspective to PEO. Throughout my career I've balanced technical execution with strategic thinking – managing risk while delivering impactful outcomes.

A dedicated volunteer with PEO for nearly 20 years, I have contributed extensively to regulatory and governance work. My approach to Council work continues to be grounded in objectivity, collaboration and evidence decision making. I strive to be open minded, to listen to others and to adjust my position when data supports a different path forward.

During my past term on Council, we made significant progress on the Strategic Plan, including developing the current version – one that is both dynamic and forward-looking. I have been an active participant in Council and committee meetings and have voted on every motion before Council that I was able to. There is still important work ahead for PEO, and I would like the opportunity to continue contributing to that effort and ensuring that the public interest remains paramount.
