

Randall Walker Candidate for President Elect

As engineers, our mandate is grounded in public trust. Strong governance, disciplined regulation, and principled leadership are essential to maintaining that trust—and these are the areas where I have dedicated my service to Professional Engineers Ontario.

I bring many years of institutional knowledge of PEO operations and Board Experience which makes me a strong leader while my work over the last 30 years gives me broad in-depth views that will help in creating board agenda that will only strengthen PEO.

My leadership style is straightforward:

**Listen objectively.**

**Ask hard questions.**

**Respect the evidence.**

**Make decisions that serve the public above all else.**

I value collaboration, transparency, and disciplined, data-driven governance. I am not driven by personal agendas—only by a commitment to strengthen the profession and the regulatory system that safeguards it.

If elected President Elect, I will continue to champion:

- **Clear, accountable governance at the Council table**
- **Evidence-based regulatory decision-making**
- **A modern licensing system that reflects today's engineering realities**
- **Respectful, inclusive leadership that values the contributions of all P.Engs**
- **Strong alignment between Council, staff, chapters, and stakeholders**

I believe PEO can be a world-class regulator—one that upholds public safety, supports competent practice, and earns the confidence of every Ontarian. I would be honoured to continue serving and contributing to that mission.
