

Fellow Engineers,

Only about 10% of engineers voted in the previous PEO election. When Council doesn't hear from 90% of the profession, regulatory decisions get made in isolation from the practice realities that protect public safety.

That's why I'm running for **Councillor-at-Large**.

Who I Am

As Vice President, Municipal Infrastructure, I lead water and wastewater projects across Ontario where public safety depends on getting it right. I've served PEO's Toronto-Humber Chapter for over a decade in leadership roles including Chair and Vice Chair, organizing 30+ member events, moderating election debates, presenting licenses to new engineers, and mentoring engineers through licensure.

Both experiences have shown me that effective regulation depends on clarity, transparency, and genuine engagement with the engineers it serves.

My Priorities

- **Enhancing Member Engagement:** Strengthen connections between PEO and its members, ensuring Council decisions reflect industry realities and amplify member voices.
- **Ensuring Transparency:** Remove communication barriers between members and Council so engineers understand how decisions affect their practice and the public.
- **Modernizing Pathways for Aspiring Engineers:** Champion reinstatement and modernization of the EIT program to create clear, supportive pathways to licensure.
- **Strengthening Collaboration with OSPE:** Partner to deliver quality continuing professional development and bridge regulatory policy with industry practice.
- **Promoting Quality-Based Selection:** Ensure engineering services are selected on merit to protect public safety, professional standards, and public trust.

Why This Matters

PEO needs Council members who can bridge policy and practice. Fresh perspective combined with proven experience creates the balance our regulator needs as PEO continues its modernization journey while staying grounded in member realities.

Voting closes February 23. Your credentials were sent from vote@simplyvoting.com or visit peovote.ca

I'd be honoured to earn your vote.
