

## **A Stronger Profession Starts With Your Vote**

### **Support Darla Campbell for PEO President-Elect**

The engineering profession is evolving rapidly, and PEO must evolve with it. That's why I'm asking for your support in this election. I'm running for President-Elect to strengthen our profession, reinforce the value of the P.Eng. designation, and ensure PEO remains relevant in a world shaped by emerging technologies and new engineering disciplines.

Today's engineering landscape includes software, computing, cyber, quantum, and other digital fields that increasingly influence public safety. To remain an effective regulator, PEO must **create clear, inclusive pathways to licensure for every engineering graduate, including digital disciplines**. Strengthening the EIT program and modernizing our approach to licensure are essential steps toward a future-ready profession.

A strong profession also requires a **strong regulatory voice** that protects the public interest and engages elected officials consistently and effectively. Our GLP representatives and chapters play a vital role in this work, and I am committed to supporting them with clarity, alignment, and purpose.

We must also continue to **enhance the P.Eng. brand**. A strong brand depends on a strong regulator: shorter wait times for licensing, timely responses to complaints and discipline, and modern standards of practice that reflect the realities of today's engineering challenges, including climate adaptation and mitigation.

During this campaign I've visited chapters and witnessed 95 new engineers receiving their licence, an experience which is both inspirational and a strong reminder of the important role of chapters in welcoming engineers to the profession.

I chose engineering because it offered the opportunity to join a profession built on integrity and service. I continue to wear the P.Eng. designation with pride. I'm running to strengthen the profession for the next generation.

Your vote is your voice. Let's strengthen our profession together.
