

My dear engineers,

It's time we wake up and exercise our right to vote for our candidates for next year at Professional Engineers Ontario.

In my personal opinion, we should support engineers with vast experience at the chapter level, as they have consistently demonstrated dedication, leadership, and true volunteerism to our engineering community.

PEO needs strong, experienced candidates—individuals who can make informed decisions on EIT matters, promote regular and meaningful webinars, support and strengthen self-regulation, and actively monitor municipalities that manage billions of dollars in engineering projects, ensuring that professional engineers are properly engaged and responsible for signing off on designs.

Our vote matters. Let's choose wisely for the future of our profession.

ENGINEERING symposium expansion initiative

The West Central Chapter successfully hosted an Engineering Symposium that benefitted seven of our members, providing valuable insights into engineering innovation. Building on this success, our goal is to extend the symposium model to all 31 chapters. By doing so, every chapter member will have the opportunity to participate, learn, and collaborate on cutting-edge engineering practices. This expansion will foster knowledge-sharing, strengthen chapter connections, and ensure that innovation reaches our entire community.
