

Dear PEO Members,

As voting enters its **final days**, I would like to share one **brief and sincere note**.

Professional Engineers Ontario exists to protect the public interest. At a time of **rapid technological change, evolving practice models, and rising expectations, strong and steady regulatory leadership** matters more than ever.

In addition to the broader challenges facing PEO, **continuity is especially important** as Council decisions move into **implementation**. **Current priorities include:**

- **Implementing approved EIT reforms**, ensuring effective delivery for **domestic and internationally trained graduates**
- **Making CPD meaningful and value-added**, without unnecessary burden
- **Strengthening the Government Liaison Program (GLP)** by building on its strong foundation
- **Addressing emerging technology risks** through **proactive, risk-based regulation**
- **Enabling a more proactive and efficient PEO**, focused on **timely decisions** and **clear processes**

WHY PRESIDENT-ELECT

- ✓ **Proven leadership in complex, safety-critical systems**
- ✓ **Strong governance and regulatory judgment**, grounded in nearly two decades of PEO service
- ✓ **Clear focus on member experience**, within PEO's legislated regulatory mandate
- ✓ **Commitment to public protection**, ethical practice, and accountability

I am seeking the **President-Elect** role to **provide continuity** in this work and to continue serving the profession **in the public interest**.

Voting closes February 23 at 10:00 a.m.

Thank you for your time, your engagement, and your participation in **professional self-regulation**.

With respect and gratitude,

Dr. Sardar "Asif" Khan, PhD, MBA, P.Eng., PMP
Candidate for President-Elect
